27<sup>th</sup> July 2005

Dear,

This is a formal invitation to attend the 1-day **National Workshop**, organised and coordinated by the AUTC Physics Project team. It is to be held at the University of Sydney on **Wednesday 28 September** in conjunction with the 2005 National UniServe Conference. The workshop will be taking a close-up look at many of the good approaches which have been identified by the project and discussing the key learning and teaching issues presently confronting Australian physics departments. We cordially invite members of your departmental staff to attend.

In order to assist with expenses incurred in making the trip to Sydney, the AUTC project is providing partial subsidies to departments. Your department will be entitled to a subsidy of \$.

If sending multiple delegates to the workshop your department may be able to claim a larger amount if there is unclaimed money at the end. Subsidies will be payable immediately after the workshop. Departments should invoice the School of Physics, Monash University, with details confirmed on receipt of registration. Subsidy queries can be directed to Dr David Mills, project team co-leader.

Registration is free but required. Participants need to register via the project website, which contains detailed information on the day's structure, before **Monday 19 September**. The website is located at:

<http://www.physics.usyd.edu.au/super/AUTC/Workshop/>

Please feel free to contact me if you have any questions about the workshop or any aspect of the project.

Hope to see you on September 28.

Yours sincerely,

Alberto Mendez  
Project Officer,  
AUTC Physics Project
