INDEX

aberrations 48, 102
absorption 17
accommodation 111, 113
achromatic doublet 49
Airy disc 75
amplitude 3, 53, 54
analyser 87
angle of incidence 19
angle of reflection 19
angstrom 6
angular frequency 5
angular magnification 44, 116, 118, 119, 120
angular position 60
angular resolution 80
angular size 115
anti-reflection coating 66
aperture 107, 109, 110
lens 109
aperture ratio 109
aperture stop 107, 108
aqueous humour 111
astigmatism 103, 113
axis
optic 90, 91
polarising 86
bandwidth 61
barrel distortion 104
beam 16
biaxial crystal 90
binoculars 102
birefringence 90-96, 98
induced 98
birefringent material 90, 96
black light 13
blooming 66
Brewster angle 97, 98
brightness
image 107, 109, 110
calcite 90, 95
camera 110
cardinal points 105
Cellophane 90
centre of curvature 47
chromatic aberration 49
circular aperture
diffraction pattern 75-76
circular polarisation 87, 89, 91-94, 98
coherence 58, 60, 61, 125
coherent sources 9, 58
colour 19
coloured fringes 65
coma 102
combination of lenses 45
components of polarisation 85
compound lens 46
concave lens 47
condenser 123
cone 112
constructive interference 55
continuous spectrum 10
contour fringes 66
convergence 39, 40
converging beam 36, 39
converging lens 37, 38, 40, 43
convex lens 47
cornea 36, 111
corneal reflector 24
corpuscular hypothesis 2
corpuscular theory 2
critical angle 23, 25
crossed polarisers 87
crystal 90
biaxial 90
uniaxial 90, 95
curvature 36, 47
curvature of field 103
cylindrical lens 50
dark field illumination 124
depth of field 110
destructive interference 55
diaphragm 107
dichroic material 90, 97
dichroism 90
diffraction 37, 55, 70, 109, 113, 121
diffraction envelope 78
diffraction pattern 70, 72
diffuse reflection 18
dioptre 40
dispersion 26-27
distortion 104
divergence 40
diverging beam 37, 39
diverging lens 37, 39, 42, 43, 44
double image 94
double slit (see Young’s experiment)
electric field 5, 84
electromagnetic spectrum 12
electromagnetic wave 5, 12
elementary wave 3, 5, 84, 85
elliptical polarisation 89
endoscope 25
energy 2, 55, 56, 61, 66
entrance pupil 108, 109
envelope 78
exit pupil 108, 123
extraordinary wave 90, 92
eye 8, 36, 111, 116
eyepiece 102, 117, 119, 120, 121, 122
f-number 109
far vision 116
field of view 122
film 110
filter 86, 90
first focal plane 41
first focal point 41
flatness, test for 66
fluorescence 13
focal length 38, 43, 105
measurement of 50
focal plane 38, 39, 41
focal point 38, 39, 104, 105
focal ratio 109
focus 36, 39, 110, 111
focussing 110, 116
Foucault 2
Index

Fraunhofer diffraction 72
frequency 5, 6, 10
Fresnel 2, 71
Fresnel diffraction 72
fringe 56, 59, 60, 70
washed-out 61
fringe pattern 60, 61
fringe spacing 60, 61
fringes
